

THE PEOPLE'S MOU

Dear _____,

We, the people, commit to defending the safety of our communities, the wellbeing of our ecosystems, and the future of our planet.

And we urge you, as a representative of the Government of Canada, to commit to:

Stop fast-tracking destruction: Abandon the dangerous recent proposal that exempts mega-projects from safety and environmental regulations.

Protect our communities and the land: Uphold Indigenous rights, environmental protections, and ensure meaningful consultations with impacted communities.

Stop building climate-burning pipelines: Reject the proposed toxic tar sands pipeline from Alberta to the Pacific coast, and end all new oil, coal, and gas extraction in Canada.

Accelerate the energy transition: Deliver a strong climate action plan and launch a roadmap to phase out fossil fuels while supporting workers and communities.

Stop letting Big Oil profit at our expense: Impose a 75% excess profits tax on the wartime windfall of fossil fuel companies and end subsidies for the fossil fuel industry.

Fund our future: Invest in East-West-North electricity grids that bring affordable, renewable energy to all, while uplifting Indigenous leadership and creating tens of thousands of good, green jobs.

Stop capitulating to the interests of greedy Big Oil billionaires, and put the people first. We urge you to sign this deal with your constituents and commit to protecting our communities, our climate, and our future.

Sincerely,
Your Constituents
